Journal of Fluid Mechanics **Volume 347 25 September 1997**

C.-S. Yih Evolution of Darwinian drift *page* 1

R. W. Griffiths & J. H. Fink Solidifying Bingham extrusions: a model for the growth of silicic lava domes 13

J. R. Ristorcelli A pseudo-sound constitutive relationship for the dilatational covariances in compressible turbulence 37

S. S. Lee Generalized critical-layer analysis of fully coupled resonant-triad interactions in boundary layers 71

M. Ungarish The spin-up of liquid metal driven by a rotating magnetic field 105

P. L.-F. Liu & J. Wen Nonlinear diffusive surface waves in porous media 119

J. Priede & G. Gerbeth Hydrothermal wave instability of thermocapillary-driven convection in a coplanar magnetic field 141

A. Salhi & C. Cambon An analysis of rotating shear flow using linear theory and DNS and LES results 171

H. J. S. Fernando & J. C. R. Hunt Turbulence, waves and mixing at shear-free density interfaces. Part 1. A theoretical model 197

J. L. McGrath, H. S. J. Fernando & J. C. R. Hunt Turbulence, waves and mixing at shear-free density interfaces. Part 2. Laboratory experiments 235

Y. Komai & K. Tanishita Fully developed intermittent flow in a curved tube 263

K. H. Bech & H. I. Andersson Turbulent plane Couette flow subject to strong system rotation 289

N. Peake & E. J. Kerschen Influence of mean loading on noise generated by the interaction of gusts with a flat-plate cascade: upstream radiation 315

M. I. Khan & G. I. Tardos Stability of wet agglomerates in granular shear flows 347

J. Delfs & H. Oertel Jr Dynamics of localized disturbances in engineering flows: a report on Euromech Colloquium 353 369

J. E. Broadwell Shocks and energy dissipation in inviscid fluids: a question posed by Lord Rayleigh 375
